for Laboratory and Interagency Liaison

BNL PROPOSAL FOR NIH GRANT ENTITLED "EPIDEMIOLOGY OF OSTEOPOROSIS:
PREVENTION AND THERAPY"

We have reviewed the proposal from Dr. Stanton H. Cohn entitled
"Epidemiology of Osteoporosis: Prevention and Therapy," to be sub-
mitted to NIH.

As best as we can judge, the program is of mutual interest to ERDA
and NIH and neither staff nor facility commitments will interfere
with present or future ERDA needs. On this basis, we recommend that
the required number of copies of the proposal be sent to the appro-
priate official at NIH.
