July 12, 1974

Note to Mr. Rowden

Enclosed for your review and concurrence, as appropriate, is a proposed final report of DBER/INS on the plutonium injection matter. I worked with DBER/INS on an earlier version. Subsequently, several changes have been made. While I have no substantive problems, there are, as you can readily see, some problems of an editorial nature. I have refrained from correcting the editorial problems in view of the apparent urgency in getting the document to Mr. Erlewine.
