Dear Dr. Waterhouse:

Some of the results on Case No. 40-009 are coming through. At this point we need to study her medical records of 1945 when injections were given, to determine what her liver status, degree of anemia, hypoproteinemia, and etc. were. I hope you can mail on to us a transcript of her medical records.

Blood for chromosome studies arrived safely with Dr. Hoegerman.

Your suggestion about holding off on admitting patients 2 and 3 until we have seen 40-009 through, is certainly sound and I relayed your recommendation to Dr. Robert E. Rowland, who agreed.

Many thanks again for your spirited assistance.

Very truly yours,

Margaret S. Littman, M.D.
