Mr. John Gallimore
Health Physios Dept.
Carbide and Carbon Chemical Co.
Plant Y-12
Oak Ridge, Tenn.

Dear Mr. Gallimore:

We seem to have run into quite a lot of difficulty these past few weeks with the urine collections on [REDACTED] U-VII. On the week ending March 25th we received 6 bottles, three of which were labeled from 8 A.M. on one date to 8 P. M. on the next day (from about 3-8-55 to 3-10-55) but which were obviously not 36 hour specimens. Furthermore we were suppose to have received that period previously. The next Friday, April 1st, we received 9 unlabeled bottles. Is there any point in shipping any of these to you, or shall I throw them away?

However, [REDACTED] returned to the V. A. Hosp. last week, and I believe collections began again last Wednesday, March 30th. So we should have better success from now on, I hope.

Would you kindly address future boxes (but we have plenty for the present) to me instead of to Dr. Luessenhop, since when they come in in his name they try to deliver them to Baker where he is now working. But if they are sent to me they will come directly to the lab.

We are all sorry that we have had so much trouble infinding a suitable U patient. There are still none in sight. But we all still have it in mind, and will keep you informed.

Sincerely yours,

Janette Robinson

Janette Robinson, Res. Asst. to Dr. Wm. H. Sweet
