Dear Neal:

Enclosed is a copy of a letter from Herman Cember and my reply.

I hope to be able to get together with you and others from Paducah sometime in early February in order to evaluate the data collected at Hanford.

I understand you were considering hiring Abe Goldin, from all reports he is a very capable radiochemist. I am sorry that he chose NYU instead. This brings to mind another very capable radiochemist who you may be interested in contacting. He is Henry G. Petrow, Assistant Director of Research, Ionics, Inc., 152 Sixth Street, Cambridge 42, Massachusetts. Henry's capabilities and background in radiochemistry compare favorably with Abe's. Henry does not have a Ph.D. and, for this reason, is interested in an institutional position where he could work toward a Ph.D.

I look forward to seeing you in February and hope Hanford has the information you need.

Sincerely yours,
