NATIONAL INSTITUTES OF HEALTH

Dr. Charles L. Dunham, Director  
Division of Biology and Medicine  
U. S. Atomic Energy Commission  
1901 Constitution Avenue  
Washington 25, D. C.

Dear Doctor Dunham:

We should like to invite you to participate in a working conference on the clinical aspects of radiation injury and the transplantation of bone marrow and other organs, which will be held September 18 and the morning of September 19 in the auditorium of the Clinical Center at the National Institutes of Health, Bethesda, Maryland.

This is one of a series of group meetings instituted at the Oak Ridge National Laboratory. These are held at various institutions three times yearly and consist of informal presentations of work in progress. This conference will consider primarily the clinical aspects of the above problems. The studies in animal systems will be reviewed at the January meeting at Oak Ridge. A preliminary Agenda for the conference is enclosed. If you cannot attend, we should be pleased to have you designate other representatives from your institution.

To facilitate planning for the conference, will you please complete and return the enclosed form letter, giving your name and institution. A list of motel and hotel facilities in the area is enclosed. Please make your own reservations early.

We are looking forward to your participation in the conference.

Sincerely yours,

*Gordon Zubrod*
