Timing Circuits

PUBLICLY RELEASABLE  
LANL Classification Group  
Gud 7/23/48

Mr. Marlowe is now available, headquarters in U-32, for consulting and design service on all problems connected with firing, timing and locking devices. I would like to ask that everyone who plans to use any such equipment discuss his problems and plans with Marlowe in order that the most economical and safest system may be engineered.

The order of priority for Marlowe's services has been established as Mack and Manley, most urgent, others to follow. I would suggest that you try to get in touch with Marlowe at your earliest convenience if you have any timing plans.
