CLASSIFICATION CANCELLED
PER DOC REVIEW JAN. 1973

DATE 9 July 1945

TO: Luis Alvarez
FROM: N. F. Ramsey
SUBJECT: Observational Equipment at Destination

This memo is to confirm the discussion by the Weapons Committee last Saturday in which it was agreed that your group should coordinate all observational measurements in the gadget after it is released from the air plane. This should include photographic observations which I believe Waldman has been planning on for some time and informer operations for determining the seating of the projectile which Brode and Birch have been planning. This responsibility of yours does not preclude the possibility of exercising these responsibilities through other groups such as Brode's group.
