Norris:

Discussion with Col. Roper:

1. L.R.G. wants Titterton to go - Roper wants your recommendations on how to handle this. I told him it ought to be handled on Washington level by W.L.O.
2. G. E. reports 200 gallons witch hazel/wk by early November.
3. L.R.G. approves your idea on Test Division - unhappy about letter direct to Parsons. Parsons not enthusiastic about River. Parsons also thinks we are premature.
Alaska is to be very secret!
4. L.R.G. wants us to be sure to consider contamination aspect before we make up our minds that the L.B. is the only bomb to meet his demands for an underwater bomb.
5. Roper stressed importance of C97 program.
