Order for Full Scale FM Charge

Confirming my verbal request made to Captain Ackerman, and to keep the records straight in accordance with Mr. Kistiakowsky's memorandum of 23 November 1944, please consider this memorandum as an order for one complete full scale FM charge, plus a reasonable number of spare castings to provide for any breakage which may occur during the initial assembly. This adds up to 15 regular pentagonal castings and 70 irregular pentagonal castings.

It is understood that the castings are to be made of pelleted Comp. B, using the molds and spacer plates furnished to S-Site from 2-Mile Mesa.

No delivery date is specified in view of the fact that we do not at present have sufficient information to judge your production rate. Once techniques and time cycle have been established we would appreciate knowing when we can expect the above castings to be completed.

R. W. HENDERSON
