Mark C. Bascia 12/17/79

Dear Dr. Oppenheimer:

In the special insurance clause to be incorporated in the California contract W-7405-eng-36, the wording of which has not been settled, there will be a reference in any case to a secret letter detailing the hazards to be covered. The adequacy of the list of hazards, it seems to me, must be passed on by you as Project Director and I am therefore sending you a draft of what we proposed in the case of the above contract.

Please advise me, as promptly as possible, as to whether the list as prepared meets with your approval.

Very truly yours,
