FROM: Test Director
SUBJECT: AGREEMENT ON USE OF CERTAIN FREQUENCIES DURING UPSHOT/KNOTHOLE

VERIFIED UNCLASSIFIED
DeBrow FSS-16 DGL 8/28/96

On 13 January 1953, you requested authorization for the use of 27.60 MC and 29.90 MC by Project 6.12 at Nevada Proving Grounds during Upshot/Knothole.

You are aware of the limitations on the use of these frequencies at certain times, and have stated that the project would not use these frequencies after H - 24 hours before certain shots.

Therefore, the Test Director's Office agrees that Project 6.12 may use 27.60 MC and 29.90 MC for mobile communications during Upshot/Knothole except that radio silence on these frequencies will be required during the following times:

H - 24 hours to H + 1 hour on the Effects shot in Frenchman's Flat.

H - 6 hours to H + 1 hour on the rehearsal for the Effects shot in Frenchman's Flat.

It is agreed that you will personally make sure that radio silence is observed by Project 6.12 on 27.60 MC and 29.90 MC, as stated above.
