Los Alamos Scientific Laboratory
University of California
Los Alamos, New Mexico

OFFICE MEMORANDUM

ALLA0008078

TO : Seth R. Woodruff, Jr., Field Manager, NFG Date: December 8, 1952
FROM : R. W. Newman, J-6, LASL
SUBJECT: Construction Photographs
SYMBOL : *J-16020*

It is requested that a complete file of the construction photographs taken by the Architect-Engineer for Upshot/Knothole be furnished this office at the completion of the next operation. A reference file of this type would relieve the Laboratory of the necessity for sending a photographer to the site to cover the initial construction period. Reports required of all operating groups nearly always include a few construction photographs. Therefore, it is requested that a mechanism be set up by which copies of some of the photographs may be obtained if requested by the using agency. The photographic section of the Test organization will continue to take construction photographs which are requested by the using organization or which are considered necessary by the Test Director.

FOR THE TEST DIRECTOR:

R. W. Newman
J-6, LASL
