MOUND LABORATORY
CENTRAL FILE NO. 66-1-225

TO : P. E. Figgins

The SS material charged to Mr. Figgins was audited by D. D. DeBord and J. J. Krispinsky of the Accountability Group, December 17, 1965. The inventory consists of plutonium-238, U-233, depleted uranium and thorium. All containers of SS material were located and identified. The data obtained during the physical sight inventory agreed with the November 30, 1965 Inventory Report.

In our opinion satisfactory SS material control is being maintained and no recommendations are necessary at this time.

Summary of Inventory

Plutonium-238	Allotment DA-50000-05-1	244.78 g.	184.77 g.
U-233	Allotment A-50000-00-01	310.75 g.	304.99 g.
Depleted Uranium	--	757 g.	
Thorium	--	878 g.
