DATE October 21, 1968
TO H. M. Parker, Chairman
Committee for Review of Human Experiments
FROM D. McConnon/I. C. Nelson/H. E. Palmer
D. McConnon
SUBJECT APPROVAL FOR STUDIES OF PROMETHIUM
METABOLISM IN HUMANS

AJ Haverfield
D McConnon
IC Nelson
HE Palmer

The attached collection of papers is presented to the Committee for Review of Human Experiments to substantiate the need for the proposed studies; to describe the experimental methods to be used; and to evaluate the toxicological aspects of materials and amounts used.

The present studies are concerned with inhalation of promethium chloride. Future studies will elucidate the behavior of promethium oxide following inhalation; however, additional development is required and approval of such studies will be sought at a later time.

Approval to proceed with the studies as described herein is respectfully requested.
