RESEARCH INVOLVING HUMAN SUBJECTS

Through our Operating Guides, I am personally (by name) assigned certain responsibilities and authorities in this subject area on behalf of the Director. In particular, I make determinations (usually with the benefit of advice from Carlos Newton and/or Herb Parker) on whether proposed activities need to be submitted to the Human Subjects Review Committee for formal review.

I recommend that the duties now assigned to me be re-assigned to Herb Parker. Herb is Chairman of the Review Committee and may find some restructuring of the committee desirable as a result of changes in personnel assignments.
