DONNER LABORATORY  
BERKELEY 4, CALIFORNIA

October 19, 1953

Dr. Charles L. Dunham  
Chief, Medical Branch  
Division of Biology and Medicine  
USAEC  
Washington 25, D. C.

Dear Dr. Dunham:

Under separate cover we are sending you the slide you requested showing the distribution of radio-iodine in a patient 1 hr., 48 hrs., and 96 hours after administration of radio-iodine. I hope that this slide can be used for reproduction purposes.

The article describing our scanner by Hal Anger has just appeared in the American Journal of Roentgenology, Radium Therapy and Nuclear Medicine, 70, 605-612 (October, 1953). I hope to have a report on the pinhole camera and image amplifier finished within a month and I shall send you an early copy of it.

It was nice having all of you here for the Directors' meeting. Please do not hesitate to call us if we can be of any assistance.

With kind personal regards,

Sincerely yours,

*Toby*  
Cornelius A. Tobias
