Dear Dr. Hardie:

Dr. Donald Cooksey of the University of California, Radiation Laboratory, forwarded to you my letter of December 5th concerning who is suffering from beryllium poisoning of the lungs.

I have no knowledge as to the scope of your work; however, I presume that you are interested in knowing where cases of berylliosis exist, their origin, the therapy used, etc. If you do not have knowledge of case, may I suggest that you contact either

or Dr. Myron Freilich, Market Street, Zanesville, Ohio.

~~It is hoped that through the exchange of information, further aid may be afforded~~

Sincerely yours,

*C. A. Wagner*
