1131 14th Avenue, South
Seattle, Washington 98114

Dear Dr. Paulsen:

It is proposed to have a review of your research project on Thursday, December 14, 1967.

The purpose of this review will be to determine:

1. The significant progress that research in your laboratory has made to date.
2. The effort and time necessary to complete the evaluation of x-ray effects on the human testicular tissues and function.
3. Status of neutron effects studies.
4. Significance of the changes in direction and effort brought about or anticipated through the addition of Dr. O'Keefe on the project.
5. Review of the biometrics panel recommendations resulting from their visit at the project in September 1967 and other topics that you may think are of particular interest to the review group.
6. Executive session.

A list of the members of the review team will be sent to you when the list is finalized. In the meantime if you have any suggestions either as to the proposed review areas or reviewers that you may think would be particularly appropriate, please let me know.

Sincerely yours,
