

DRAFT

703970

Colonel Charles C. Berdjis
4 Cretes-de-Champel
Geneva, Switzerland 1206

Dear Colonel Berdjis:

We are interested in the role of radiation as an etiological agent for testicular cancer. I have seen your abstract, "Radiation-Induced and Spontaneously Occurring Testicular Tumors," Radiation Research 74:548, 1978. Did you ever publish a longer paper on this topic? If so, I would appreciate the reference, or a ^{re}~~newsprint~~ if available. If not, the references on which your abstract was based would be useful.

Sincerely,

James S. Robertson, M.D., Ph.D.
Director, Human Health and
Assessments Division
Office of Health and Environmental
Research, Office of Energy Research

Sorry, hadn't noticed the error. JSR
