Lush: With respect to your message of today, 15:36, by electronic mail, subject: REAC/TS - Moroccan Accident, please be advised that the initial guidance for FY 85 will provide you with \$ 30,000 of cost for coverage of the Mexican accident medical assistance. Let me know if this covers the "additional financial support" that you mention in this message.

Is there any objection to pass on the attached information to Dr.Trivelpiece's office? Do you have any communication with Jammet?

Subject: YOUR AUGUST 27 MESSAGE AND QUESTIONS

Joop:

I appreciate your prompt reply confirming that OHER will provide \$30,000 in FY 1985 for our medical assistance to the Mexican radiation accident. This is the "additional financial support" I requested in my message, Monday, 17 August 1984.

There is no objection to your passing on the attached information about the Casablanca accident as long as it is treated "administratively sensitive" or "Official Use Only" so that its source is protected.

Yes, I am in communication with Dr.H. Jammet, Director, WHO International Centre for Radiation Pathology (Europe) because of my designation as Director, WHO, International Center of Radiation Pathology (Western Hemisphere), a part of OHER'S REAC/TS Program.

I need you to know, WHO/IAEA provides no financial support to these programs unless a request for assistance comes to them in an emergency from a foreign government member of UN. PAHO/WHO has paid only the cost of Dr. Hubner's first trip to Juarez, whereas OHER/REAC/TS has now supported one trip by Hubner to Mexico City and one by me to Juarez since Hubner's resignation.

Lush
