Subject: Reply to: Phelps meeting with the President

I talked to Trivelpiece about this, and he had heard about it from the Secretary (or Keyworth) after the meeting had taken place. He knows who was there, and what it was all about. A biweekly report would be fine, if there is anything of substance to report. Let's await Ricks' write-up.

Subject: JUAREZ ACCIDENT INVESTIGATION

Dear Jim:

We at last have heard that the Mexican government wants us to continue the Juarez accident investigation. I was asked to submit a new condensed proposal and set up a U.S. oversight committee with PAHO and EPA to work with the Mexican officials. I'm thermofaxing a of this proposal to you and would like you to pass a copy on to Bob Goldsmith. I foresee that the first real step will be for me to go to Juarez and obtain blood samples again since an old venapuncturer will be needed. Perhaps you would like to volunteer?

Yours,

C. C. Lushbaugh, Ph.D., M.D.
Chief, Radiation Medicine

Text:

Thanks for the new info re the Mexican situation. And thanks for the 'job "job offer" but doubt that it's feasible. I'm sure you can cope. JSR
