Dear [REDACTED]

Your letter concerning [REDACTED] addressed to the Isotope Division has been referred to this office for reply.

The information you have read concerning the establishment of a cancer research program under the Oak Ridge Institute is correct. However, it should be noted that this program will not be activated until the latter part of this year, and perhaps will not be ready to receive patients until January 1, 1949.

It is suggested that your patient be referred to some nearby individuals who are using intravenous isotope therapy. These are Dr. Roy Kracke, Dean, University of Alabama Medical School, Birmingham, Alabama and Dr. Paul Hahn, Vanderbilt University School of Medicine, Nashville, Tennessee.

In reply to your question concerning classes in isotope instruction, it is suggested that you make formal application to the Isotope Division, U. S. Atomic Energy Commission, P. O. Box E, Oak Ridge, Tennessee.

It is hoped that the above information may prove beneficial to your patient.

Sincerely yours,

Harry Stoeckle, M.D.
Acting Chief
Division of Biology and Medicine

Isotope Division,
Oak Ridge, Tenn.

Gentlemen:

We have a patient,  who has Lymphatic Leukemia. We have about exhausted the benefits of x-ray therapy.

His W. B. C. was 220800, 8/7/45 with Neutros 3%, Lymphs 96%, E 1% - R. B. C. 3900000, Hb. 88%.

The white count was 76000 in one month later and has varied since from 18000 to 42000, 50000, 40000, 32000, 48000, 50000, 56000, 60000, 30000, 35000, 63000, 56000, 83200, 96000, 128000, and last on 6/29/48 was 100000 with L 99, Seg. 1, Polyl.

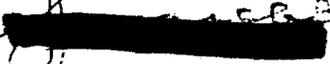

All nodes have been treated except abdominal.

He wants to know if you can take him at Oak Ridge for intravenous isotope treatment.

He is not able to pay much and I have charged him less than 50% regular charge for the x-ray.

May we hear from you at your convenience?
Thanks very much.

Sincerely,

Handwritten notes:
W. B. C. 220800
R. B. C. 3900000
Hb. 88%
L 99, Seg. 1, Polyl.
Roy
Bain
Paul
Vanderbilt

P. S. When might I join one of the classes in isotope instruction?

ssm/y
