

United States Government

Department of Energy

memorandum

707496

DATE: September 15, 1993

REPLY TO
ATTN OF: ER-72

SUBJECT: Approval of Procurement by Martin Marietta Energy Systems, Inc.,
Midwest Research Institute -- Electric and Magnetic Fields Study

TO: Martha J. Kass, ORO

This is to confirm approval in writing of the Human Subject Project you sent to our office (see the above subject). Having an HHS-approved multiple project assurance expedites the process considerably and while we do not have to reapprove these HHS-approved packages, the information and communication on DOE-supported work is very important. Thank you.

Susan L. Rose, Ph.D.
Radon Manager, Health Effects and
Life Sciences Research Division
Office of Health and Environmental
Research, Office of Energy Research
