AEC CONTRACT NO. AT-(40-1)-3734

Dear Dr. Smith:

Last year the Division of Biology and Medicine sent letters to our "on-site" contractors who are doing experimental work involving human subjects, to inform of the DBM decision to adhere to the USPHS procedures for protection of the individual as a research subject.

This year the standard procedure is being extended to our "off-site" contractors, i. e., those universities cooperating with us in special research contract agreements.

Dr. Totter has asked that we forward to you the enclosed letter addressed to you along with the USPHS brochure. Notice that an acceptable assurance is to be filed with the Division of Biology and Medicine by June 1, 1971, and that your contract renewal proposal hereafter must include a formal statement of compliance plus a listing of any changes that have occurred in your review committee or in your procedures.

Sincerely,

RECEIVED/SIGNED BY
 C. S. SHoup

AEC-SUPPORTED RESEARCH INVOLVING USE OF HUMAN SUBJECTS

Since my letter of March 25, 1971, the names of several additional AEC off-site contractors have been brought to my attention whose experimental studies may involve human subjects. We want to include them in our Division's effort to insure that all AEC-supported research on human subjects is conducted in a manner that provides for the rights and welfare of the individual.

Enclosed is a letter to Dr. E. M. Smith, University of Miami, whose research contract is under your jurisdiction. Please transmit this letter and the USPHS pamphlet entitled "Protection of the Individual as a Research Subject" to Dr. Smith. Your cooperation in this matter is appreciated.

John R. Totter

Dear Dr. Smith:

In order to standardize administrative procedures aimed at insuring that all AEC-sponsored research involving human subjects is conducted in a manner that provides for the rights and welfare of the individual, the Division of Biology and Medicine recently adopted the U. S. Public Health Service procedures described in the enclosed booklet, entitled "Protection of the Individual as a Research Subject." As a result of this action, it is requested (1) that your organization, by June 1, 1971, place on file with the Division of Biology and Medicine an acceptable assurance as described in the USPFS brochure beginning on page 5 and (2) that, in all subsequent years, the contract renewal requests from your organization include a formal statement of compliance plus a listing of any changes that may have occurred in your review committee or procedures.

Should you have any questions regarding this matter, please contact Dr. Bruce B. Boecker of our Medical Research Branch staff (phone 301-973-3394).

Your cooperation will be appreciated.

Sincerely,

John R. Totter, Director
Division of Biology and Medicine
