Office Memorandum • UNITED STATES GOVERNMENT

TO : Kimball Prince, General Attorney,  
Sandia Corporation

FROM : James L. McCraw, Assistant Manager  
Inspection & Storage Operations

SUBJECT: AGREEMENTS BETWEEN AEC AND DOD AGENCIES REGARDING  
OPERATION OF AEC STORAGE SITES.

SYMBOL: ISO:PHS (ST-1092)

DATE:

MAY 22 1958

The attached Storage Operations Agreements are for your retention.

The AEC/ALO-AMC Storage Operations Agreement is a revised version and supersedes AT(29-2)-280.

The AEC/ALO-DA/OCO Storage Operations Agreement is an original agreement with the Department of the Army.

We have distributed copies of the applicable ALO-military service agreement to each Site Manager. They are available to the Project Engineers for reference, if required.

Enclosures:

- AT(29-2)-570 12/25B
- AT(29-2)-563 20/30B

Classification Changed to: unclassified

## AEC/ALO - AMC STORAGE OPERATIONS AGREEMENT

1. The Parties. The parties to this agreement are the Albuquerque Operations Office (ALO) of the Atomic Energy Commission (AEC) and the Air Materiel Command (AMC), United States Air Force.
2. Purpose. The purpose of this agreement is to implement the AEC-Department of Defense (DOD) agreement dated August 3, 1955, dealing with stockpile operations insofar as such AEC-DOD agreement pertains to the operation of ZI Operational Storage Sites and to delineate the responsibilities of ALO and AMC at the Sites.
3. Definitions.
  - a. AEC weapons - Weapons based on the use of nuclear energy of which AEC has custody.
  - b. DOD weapons - Weapons based on the use of nuclear energy of which DOD has custody. This category includes:
    - (1) Service weapons - weapons transferred to DOD by AEC by direction of the President;
    - (2) Training weapons - weapons, generally inert, produced by AEC for DOD for purposes of instruction;
    - (3) Operational suitability test (OST) weapons - weapons, less special nuclear material, produced for, or custody of which is transferred to, DOD for the purpose of Service evaluation of compatibility with delivery systems; and

UNCLASSIFIED

[REDACTED]

# UNCLASSIFIED

- (4) Service produced weapons - weapons, generally less than complete weapons and containing no nuclear components, produced by DOD and retained in DOD custody.
  - c. Storage inspection - A continuing program of periodic non-destructive tests and surveillance to determine that weapons components and assemblies are functioning within specified requirements and are maintained in the desired state of readiness.
  - d. Quality assurance - A continuing program of test and evaluation to determine whether weapons, weapons components and ancillary equipment are of satisfactory quality, to determine the degree of conformance to design intent and to determine the status of functional stockpile readiness through the use of storage inspection reports and other checks.
  - e. Custody - The legal responsibility for the accounting for and safekeeping of atomic weapons and their components.
4. General Operations of Site
- a. General Control and Responsibility. The Sites are to be jointly occupied and operated by ALO and AMC as hereinafter specified. Except as otherwise provided in this agreement, however, AMC shall budget, fund and provide for all supplies, equipment and services, including site administration, necessary to operate and maintain the Sites, their facilities and equipment and to handle and store the weapons therein.

**UNCLASSIFIED**

- b. Site Construction, Alteration and Improvement. Initial construction necessary to operate the Sites, is budgeted and funded for by the AEC and is accomplished through DOD designated agencies. Any subsequent additional construction, alteration or improvement jointly determined by ALO and AMC to be necessary for performance of the Site mission shall be constructed on a similar basis and will be budgeted and funded for by ALO. Additions, alterations or improvements desired solely by AMC shall be budgeted and funded for and accomplished entirely by AMC; however, any modifications affecting the AEC function at the Sites will be made only after AMC obtains prior ALO concurrence.
- c. Weapons Handling. AEC will be responsible for all outside handling of weapons in AEC custody except
- (1) In maneuvers and readiness exercises
  - (2) Movements for shipment by air
  - (3) Handling for EWP and Strip Alert Weapons
- AMC will be responsible for handling of DOD weapons.
- d. Safety, Health and Fire Protection
- (1) Safety. AF and AEC safety standards and directives, including those dealing with the construction and location of new facilities will both be applied as minimums where AMC and ALO are both affected, and where the AF and AEC standards and directives differ, the more stringent will be followed. The safety standards and regulations and directives of AF and AEC shall each be applied as minimum requirements in all activities respectively by each agency in areas and activities under its supervision.

**UNCLASSIFIED**

[REDACTED]

UNCLASSIFIED

- (a) The responsibility for safety associated with the handling and storage of atomic weapons and other activities directly under the control and direction of ALO, shall be discharged by the AEC Manager. For example, this responsibility includes all operations accomplished in those facilities or buildings under ALO control, such as the "S" Building, or AEC Storage Structures as well as those outside operations such as loadings, unloadings, and movements being accomplished under the control and direction of ALO.
- (b) The responsibility for safety, associated with the handling or storage of atomic weapons and other activities directly under the control and direction of AMC, shall be discharged by the Station Commander. For example, responsibility includes all operations accomplished in those facilities or buildings under AMC control, such as the military plants, warehouses or storage structures, as well as those outside operations such as loadings, unloadings, and movements being accomplished under the control and direction of AMC.
- (c) Safety surveys will be accomplished by ALO and AMC in accordance with this division of responsibility. Safety surveys by off-site personnel may be conducted independently by AMC and ALO safety representatives, and by representatives of higher headquarters as desired.

UNCLASSIFIED

[REDACTED]

[REDACTED]

# UNCLASSIFIED

(d) Reports will be prepared after each safety survey.

ALO and AMC will furnish information copies of such reports, on an exchange basis, when matters of mutual interest are included.

(e) Standard safety operating procedures will be developed at each site, between the Station Commander and the AEC Site Manager, in accordance with provisions of this agreement.

The AMC Station Commander and the AEC Manager shall be responsible for the safety of employees of their respective organizations and for the procurement and maintenance of such safety clothing, equipment or devices as may be required for the protection of these employees.

The AEC Manager shall report to the Station Commander any accident, mishap, incident or unsafe conditions involving atomic weapons or military property, personnel or equipment, of which he becomes aware, and assist in undertaking corrective action as may be appropriate.

(2) Health. ALO will be responsible with assistance of AMC as required, for industrial health, hygiene and health physics directly related to activities of personnel of AEC and AEC contractors (and will provide health regulations for such activities) while AMC will be responsible for all other industrial health and hygiene at the Site. Health surveys will

UNCLASSIFIED

[REDACTED]

[REDACTED]  
UNCLASSIFIED

be accomplished by ALO and AMC in accordance with this division of responsibility. AMC will arrange for a preventive medical program at the Site, including the conduct of such pre-employment and periodic physical examinations for AEC and AEC contractor personnel as are requested by ALO. AMC will also arrange for medical diagnosis and treatment for AEC and AEC contractor personnel, within the capabilities of the local medical facilities, on the following basis:

(A) AEC employees are under the Federal Employees' Compensation Act and are entitled to emergency care and care where the injury or disease is occupational; and (B) AEC contractor personnel will be deemed to be "Designees of the Secretary of the Air Force" and thereby are likewise entitled to care, in case of emergency or occupational injury or disease. AEC and AEC contractor personnel requiring long-term care will not be hospitalized, however, beyond the reasonable period required to arrange for other hospitalization. AMC will arrange to provide ALO with copies of such medical and health records and reports on AEC and AEC contractor employees treated or examined as a result of arrangements made by AMC as may be required for health programs and employees' compensation purposes.

- (3) Fire Prevention and Fire Fighting. The primary responsibility for fire prevention and fire fighting shall rest with AMC and be discharged through the Station Commander. ALO has a concurrent responsibility to maintain fire prevention standards,

[REDACTED]  
UNCLASSIFIED

[REDACTED]

# UNCLASSIFIED

as established by the Station Commander, within those structures which it controls, and to assist in fire protective measures in regard to those structures when requested by the Station Commander. This responsibility will be discharged by the AEC Manager at the Site.

(a) AMC's responsibilities include:

1. Providing and maintaining fire fighting equipment.
2. Maintenance of trained fire fighting personnel.
3. Instruction of site personnel, including AEC and AEC contractor personnel, in good fire prevention practices.
4. Regular fire prevention inspection.
5. Keeping current a site fire plan which shall define responsibilities and procedures under the various conditions of emergency which might prevail. Copies of such plans shall be furnished to the AEC Manager at the Site, and to the Manager, ALO.

(b) ALO has responsibility for:

1. Maintaining, in structures to which access is limited by ALO, a high standard of fire prevention.
2. Periodic examinations of permanently installed fire fighting equipment in such structures and prompt reporting of need for corrective action.

[REDACTED]

# UNCLASSIFIED

3. AEC Manager will cooperate with the Station Commander to the extent necessary and provide information required to allow the Commander to maintain an up-to-date Site Fire Plan. AEC personnel may be assigned an active part in such plans and their role, under various conditions of emergency that might prevail, should be outlined in the Site Fire Plan.

(4) Fire Protection Engineering

- (a) For facilities utilized for storage, security, quality assurance, inspection, assembly of weapons, and related items of direct AEC interest, fire protection, including fire fighting forces and watchman services, shall be in accordance with ALO standards for industrial fire protection. Fire protection engineering surveys will be conducted as required by AEC regulations by ALO engineers and may be conducted by AMC specialists.
- (b) For other facilities, fire protection shall be in accordance with AMC standards. Fire protection engineering studies will be conducted in accordance with AMC directives by AMC specialists or by ALO engineers at the request of AMC.
- (c) Fire Protection Survey Reports will be prepared for each survey. Dissemination of reports and action thereon within the authority of each agency will be in accordance with the established procedures of AMC and ALO respectively.

UNCLASSIFIED

(5) Other Disasters. The Station Commander will maintain such disaster plans as are necessary to cope with other emergency and disaster situations. The AEC Manager at the Site will support the Station Commander in developing and maintaining these plans in current status. AEC and AEC contractor personnel at the Site may be assigned specific responsibilities in executing such plans and will comply upon activation by the Commander.

e. Accommodations and supplies for AEC personnel. Assignment of personnel of the AEC and its contractors and of the dependents of such personnel to family housing reserved for AEC use shall be the responsibility of ALO; provided that such housing assignment shall be limited to persons occupying the positions of Manager, Custodian, Assistant Custodian, Administrative Assistant, Technical Representative and Project Engineer. These personnel and dependents shall be subject to administrative regulation as tenants by AMC. Such personnel and dependents shall pay for these accommodations on the same basis as military personnel at the Site. The family housing reserved for AEC use shall be agreed upon from time to time by ALO and AMC as housing may become available or the need varies. Single quarters will be made available to AEC and AEC contractor personnel without regard to time limitations on tenancy. Mess, PX, and commissary privileges will be extended to these personnel in accordance with military regulations and dependent personnel of AEC and AEC contractor personnel will be granted access to Site Administrative areas on the same basis as dependents of military personnel.

UNCLASSIFIED

~~UNCLASSIFIED~~

AMC will provide and fund for all administrative supplies, equipment, materials and services necessary for AEC and AEC contractor operations at the Site including telephone and TWX toll charges in connection with official AEC messages, but excluding forms, letterheads, etc., peculiar to AEC operations. ALO will provide AMC with such budget justifications as AMC may request in order to furnish these supplies, equipment, materials and services.

Notwithstanding any other provision herein, if AMC is unable for any reason beyond its control to furnish ALO with any supplies, equipment or materials for which AMC has procurement and funding responsibility hereunder, then ALO may furnish and fund for them directly.

- f. Vehicles. AMC will be responsible for the administration and operation of Site motor pools and for the dispatch of all vehicles and handling equipment at the Site. AMC shall maintain these vehicles and equipment and shall test operators for, and issue, Government Operator's Permits required for the operation of the vehicles and equipment. ALO will control the movement of vehicles and equipment dispatched to personnel of AEC and its contractors at the Site and will assure that each operator thereof has a Government Operator's Permit. ALO will also assure that Site regulations concerning dispatch, operation, and preventative maintenance by operators are complied with in connection with such vehicles and equipment, provided that, where a vehicle involved in an accident

UNCLASSIFIED

**UNCLASSIFIED**

is operated by personnel of AEC or its contractors, accident reports and claims arising out of such operation will be handled by and in accordance with the procedures of ALO. As between AEC and DOD, AEC will defend or otherwise handle and be responsible for all claims and litigation against the Government which arise out of the operation of these vehicles by AEC or AEC contractor personnel except to the extent that liability arises out of AMC's maintenance of the vehicles or fault in the vehicles themselves.

- g. Property Responsibility and Accountability Generally. All DOD property, including vehicles and handling equipment, which is lost, damaged or destroyed, other than through fair wear and tear, while being used by AEC or AEC contractor personnel shall be subject to report of survey procedures as prescribed by AMC. However, such personnel shall not be charged for such loss, damage or destruction except where caused by such personnel's gross negligence or where the loss, damage, or destruction occurs during unauthorized use of the property. In a situation involving gross negligence or unauthorized use, the matter will be forwarded to ALO for review and if concurred in, for appropriate assistance in effecting collection. AEC or its contractors will not be charged for loss, damage or destruction of or to DOD property in any event.

All equipment items funded for by ALO shall remain the property of AEC; however, the detailed accountability records shall be maintained by AMC. Prior approval of ALO will be secured before any

**UNCLASSIFIED**

**UNCLASSIFIED**

accountable equipment item is retired, transferred or otherwise disposed of except when due to accidental destruction or through fair wear and tear. Upon request or when requiring replacement equipment, items will be returned to ALO. AMC will report to ALO at such time as any accountable item is dropped from its records.

**h. Security.**

- (1) AMC will be responsible for the physical protection of the Site. The Station Commander will be responsible for the enforcement of the control measures necessary to insure such protection.
- (2) AMC will establish security standards and procedures in coordination with ALO to assure compatibility with AEC custodial responsibility.
- (3) ALO will establish access requirements and approve entry into "A", "C", and "S" structures and other AEC occupied structures. Such access requirements will provide for access to these structures by the Station Commander or his properly authorized representatives. The Station Commander will have discharged his responsibility for security of the interior of these structures by the prevention of unauthorized entry. When these structures are occupied by AEC personnel, ALO will be responsible for insuring that only authorized persons are present in the structure.
- (4) The Station Commander will be responsible for providing upon request of the AEC Manager, physical protection for classified

**UNCLASSIFIED**

[REDACTED]

**UNCLASSIFIED**

AEC materials when being moved between the Site and rail or air head and during loading or unloading operations at such locations. If, for any reason, shipments are allowed to remain at railheads, airports or other locations, Station Commanders will provide AEC Managers with security protection, at their request. The movements will be operated as military convoys under the command of the Station Commander or his representative with the AEC Manager or his representative accompanying the military commander in order to maintain his custodial interest and to act as a technical advisor on matters affected by AEC policy or procedures. In such instances the Station Commander will be responsible for the security of the movement. The Station Commander and AEC Manager, shall, where necessary, draw up mutually acceptable standard operating plans covering the details of responsibilities, duties, procedures and authorities under normal and emergency conditions. When the AEC Manager has not requested assistance from the Station Commander for such a movement of AEC materials, ALO will be responsible for security of the movement. ALO will be responsible for security of movement of AEC materials, in the custody of AEC between AEC installations and sites or between sites, except as provided above in this paragraph. The DOD will be responsible for security of movement of classified material in custody of the DOD.

- (5) Classified information including Restricted Data will be exchanged between ALO and its contractors on the one hand and

**UNCLASSIFIED**

**UNCLASSIFIED**

AMC and its contractors on the other, to the extent necessary for the performance under this agreement; provided that in the course of this exchange access to such information shall be given only to individuals authorized to receive classified information of the classification involved. An employee of AMC or its contractors or a member of the Armed Forces is not authorized to receive Restricted Data from employees of ALO or its contractors except in accordance with the procedures prescribed in AEC Manual Chapter 2318 and AFR 205-1. AMC will certify to ALO under the provisions of Chapter 2318 and AFR 205-1 such AMC personnel and personnel of its contractors as AMC or ALO desire to receive Restricted Data directly from ALO or ALO contractor employees. It is understood that AMC will honor AEC clearances for access by employees of ALO or its contractors to classified information under the control of AMC.

- (6) AMC will be responsible for the safeguarding of all Restricted Data and other classified information received or developed by AMC or its contractors under this agreement. Such safeguarding shall be in accordance with applicable DOD regulations. ALO will be responsible for the safeguarding of all Restricted Data and other classified information received by ALO or its contractors from AMC or its contractors under this agreement. Such safeguarding shall be in accordance with applicable AEC regulations.

- 15 -

**UNCLASSIFIED**

[REDACTED]

# UNCLASSIFIED

(7) ALO and AMC representatives will conduct joint or independent surveys of security operation at the site as mutually agreed on. The result of the joint survey will be written prior to the inspectors leaving the site.

5. Special Provisions Relating to Weapons, Weapons Components and Test and Handling Equipment.

- a. Types. The Site will primarily be used for the storage and handling of AEC weapons and components. However, DOD weapons and components may be stored there to the extent mutually agreed upon by the parties.
- b. General responsibility. In dealing with weapons at the Site, the guiding principle for both ALO and AMC will be that such weapons must be maintained in the necessary state of readiness for military use. For AEC weapons, the primary responsibility for functional readiness shall be ALO's; for DOD weapons such responsibility shall be AMC's. AEC weapons and components shall be procured and funded for by AEC as will DOD service weapons and components produced by AEC. DOD training and OST weapons and components will be procured by AEC but funded for by DOD. Service produced weapons and components will be procured and funded for by DOD.
- c. Quantity and Configuration. ALO shall, with the advice and assistance of the DOD, determine the configurations in which AEC weapons will be stored. AMC will determine the quantity of AEC weapons at the Site to be held in each of these configurations. AMC will perform the assembly and disassembly operations incident to transition from one configuration to another.

**UNCLASSIFIED**

d. Special Test and Handling Equipment, Standard Tools and Equipment.

Items of special test and handling equipment (such as meters, gauges, tests sets and gear used in assembly or disassembly of weapons) necessary for the performance of the Site technical operations shall be procured by ALO in the case of weapons produced by AEC, whether AEC or DOD weapons, and by AMC in the case of service produced weapons. All such procurements, whether AEC or DOD, shall be budgeted and funded for by AMC. Standard tools and equipment used in connection with weapons testing, handling, inspection, quality assurance, maintenance and modification will be programmed by AEC and budgeted, funded for and procured by AEC or DOD in accordance with the specific program assigned. In order to preclude generation of excesses, AEC will coordinate with AMC prior to programming standard tool and equipment.

- e. Storage Inspection and Maintenance. Storage inspection will be conducted in accordance with technical manuals and instructions prepared by AEC, coordinated with DOD and issued to DOD for further military distribution. For AEC weapons non-nuclear inspections will be programmed and scheduled by AMC in collaboration with ALO. ALO will prescribe the maximum inspection time intervals and may from time to time request a specific inspection for specific weapons. Conversely, nuclear inspection will be programmed and scheduled by ALO in collaboration with AMC. AMC will perform the non-nuclear inspection with the assistance, as requested, of ALO and ALO will perform the nuclear inspections with AMC assisting as requested by ALO. All operations concerning nuclear components may be witnessed by an

**UNCLASSIFIED**

[REDACTED]

UNCLASSIFIED

AMC designated nuclear inspector. For DOD weapons AMC will program, schedule and perform all storage inspection, both non-nuclear and nuclear, with the assistance of AIO as requested, except that AIO will prescribe the maximum inspection time intervals and may from time to time request AMC to make specific storage inspection. Maintenance responsibility, as between AIO and AMC, shall follow and be the same as the responsibility for inspection as set forth above. AIO will provide the inspection forms, packaging sheets, blueprints and drawings necessary for AMC maintenance and inspection of AEC weapons. Pertinent technical data obtained from inspections will be furnished by AIO and AMC to the other, provided that AIO will be furnished complete reports of all inspections performed by AMC on AEC weapons.

f. Quality Assurance. AIO will program, schedule and perform all quality assurance inspections for AEC weapons. Specifications used by AIO for quality assurance will be compatible with AEC approved specifications issued by DOD. For DOD weapons, quality assurance will be accomplished on an exchange basis. All operations involving nuclear components may be witnessed by an AMC designated nuclear inspector. For the purpose of quality assurance AIO shall have access to AMC inspection, maintenance and modification operations involving AEC weapons or components. AMC likewise shall have access to AIO quality assurance operations at the Site. AIO will provide AMC with pertinent quality assurance inspection data to aid in its maintenance

- 18 -

[REDACTED] UNCLASSIFIED

[REDACTED]

UNCLASSIFIED

modification and inspection functions.

- g. Modifications. Modifications will be performed both at the Site and at AEC production and modification facilities. The determination that a modification will be performed at the Site or at one of production or modifications facilities shall be made by ALO and AMC after considering the magnitude of the modification, capabilities of the Site and the economics involved.

Modifications at the Site will be performed in accordance with technical procedures prepared by AEC and coordinated with DOD. Non-nuclear modifications will be programmed by ALO and coordinated with AMC for both AEC and DOD weapons. AMC will prepare the detailed modification work schedules for both AEC and DOD weapons. Non-nuclear modifications on both AEC and DOD weapons will actually be accomplished by AMC with ALO providing technical and engineering assistance as requested. Normally, nuclear modifications will not be performed at the Site. When they are performed at the Site, however, ALO will program, schedule and perform such modifications in collaboration with AMC. Regardless of whether the modifications are on AEC or DOD weapons or ancillary equipment or on test and handling equipment, special tools, materials and equipment required for such modifications at the Site will be procured by ALO except in the case of modifications of service produced weapons and their ancillary equipment. Such special tools, materials and equipment shall be funded for by ALO in the case of modifications to AEC weapons and components

UNCLASSIFIED

and their ancillary equipment and to DOD weapons, components and ancillary equipment produced by AEC (including OST weapons prior to transfer to DOD) except for training weapons and OST weapons after transfer to DOD, together with their ancillary equipment. Special tools, materials and equipment required for modifications to test and handling equipment shall be funded for by AMC.

- h. Spare Parts and Materials. Spare parts and materials for the maintenance and repair of all (both AEC and DOD) weapons, weapons components, ancillary equipment, special test and handling equipment and special tools used for weapon modification and quality assurance will be procured by ALO except in the case of service produced weapons, components and equipment. Of these spare parts and materials procured by ALO, ALO will fund for those used in connection with AEC weapons and components and special tools and equipment used for weapon modification and quality assurance. In the case of DOD weapons and components which were AEC produced, and for special test and handling equipment for such weapons, funding for spare parts and materials will be by ALO.

In the case of DOD weapons and components which were service produced, and in the case of special test and handling equipment for such weapons, funding for spare parts and material will be by AMC.

- i. Transportation Costs. Each party to this Agreement will bear commercial transportation and courier costs for the movement of their weapons and components and other material necessary to their respective missions as follows:

[REDACTED]

UNCLASSIFIED

- (1) AEC weapons and components and material necessary to AEC mission - by AEC.
- (2) DOD weapons and components and material necessary to AMC mission - by DOD (AMC).
- (3) Weapons exchanged for quality assurance or other purposes at request of AEC - by AEC.
- (4) AEC weapons returned for retirement - by AEC.

j. Reports and Records. In addition to reports dealt with in other portions of this agreement, the following reports and records will be prepared and maintained as indicated:

- (1) The Stockpile Change Report will, for AEC weapons, be prepared by ALO in accordance with applicable AEC-AFSWP records manuals and will be coordinated with AMC. Copies will be furnished to AMC as required. The Operational Change Report will be prepared by AMC.
- (2) Inventory books for AEC weapons will be prepared by the Site Manager with a copy furnished to the local Site Commander. The physical inventory will be accomplished jointly by ALO representatives and AMC representatives at intervals to be mutually agreed upon.

k. Transfer of Custody.

- (1) The determination that weapons are technically satisfactory for full release and transfer to DOD is the responsibility of AEC. When necessary, weapons determined to be not yet

[REDACTED]

UNCLASSIFIED

**UNCLASSIFIED**

technically satisfactory for full release may be transferred to DOD for dispersal or deployment with the establishment of mutually satisfactory arrangements to insure their technical suitability for use.

- (2) Custody of weapons shall under normal conditions be transferred to AMC by ALO at the request of and in the number specified by AFSWP; provided that at no time shall the number transferred to all of DOD including AMC exceed the total quantity authorized by the President.
- (3) Custody of AEC weapons may also be transferred to AMC by ALO under established AEC-DOD emergency release procedures.<sup>1</sup>
- (4) ALO will exchange AEC weapons or components for DOD service weapons or components (a) to replace weapons or components no longer operable; (b) to return operable weapons or components to AEC for surveillance or as requested by ALO; (c) to exchange operable weapons or components for which a military requirement no longer exists for similar weapons or components of a later type; and (d) to return operable weapons or components to AEC for the performance of modifications for which AEC is responsible. Under some circumstances, custody of the AEC weapon may be transferred to AMC prior to the return of the DOD weapon to ALO; provided that this does not at any time result in exceeding the total quantity of weapons authorized to be in the custody of DOD by the President.

**UNCLASSIFIED**

~~SECRET~~  
UNCLASSIFIED

(5) The normal point of transfer of custody or exchange of weapons (other than training and OST weapons) shall be at a point within the Site.

(6) AMC Operational Suitability Testing (OST) weapons now in AEC custody will be transferred to AMC up to the total quantity programmed for AMC use.

l. Readiness Exercises and Maneuvers. The conduct of readiness exercises and maneuvers of weapons at and from the AMC Operational Storage Sites shall be in accordance with the principles and procedures outlined in Agreement AT(29-2)-482 between ALO and AMC, dated October 29, 1956, on this subject.

m. ALO will furnish, through ALO contractors, without reimbursement, calibration service for site equipment used for maintaining AEC weapons.

6. Effective Period.

a. This agreement becomes effective on the date of the last signature below.

b. The agreement may be terminated at the option of either party by notification not less than ninety days in advance of the proposed effective date of termination, and any portion of this agreement may be renegotiated by mutual consent.
