RS 9100/84

organization at NSA who [redacted] greatly by this kind of briefing, and we also have in [redacted] putting them in touch with our materials research organization with the thought we might be of some assistance in this area in the future.

Because of the sensitive nature of the work of NSA and the equipment involved, I have not gone into detail in describing the briefing; however, the next time I am able to talk with you personally I will give you additional information.
