DR. JOHN H. LAWRENCE

Dear Dr. Lawrence:

I will be glad to substitute for Dr. Lowry Dobson as chair-
 man of the Radiation Laboratory Isotope Committee for human
 studies. I will begin to check over the uses of isotopes
 in the laboratory for committee approval in anticipation of
 this appointment.

The DFP-32 studies have been approved for normal people
 and patients with various hematological diseases by the
 committee as previously constituted (which is still in good
 standing with both the University and the Radiation Laboratory).
 The DFP-32 application is now in the process of renewal, and
 will have to be reapproved by the new committee as of July
 1958.

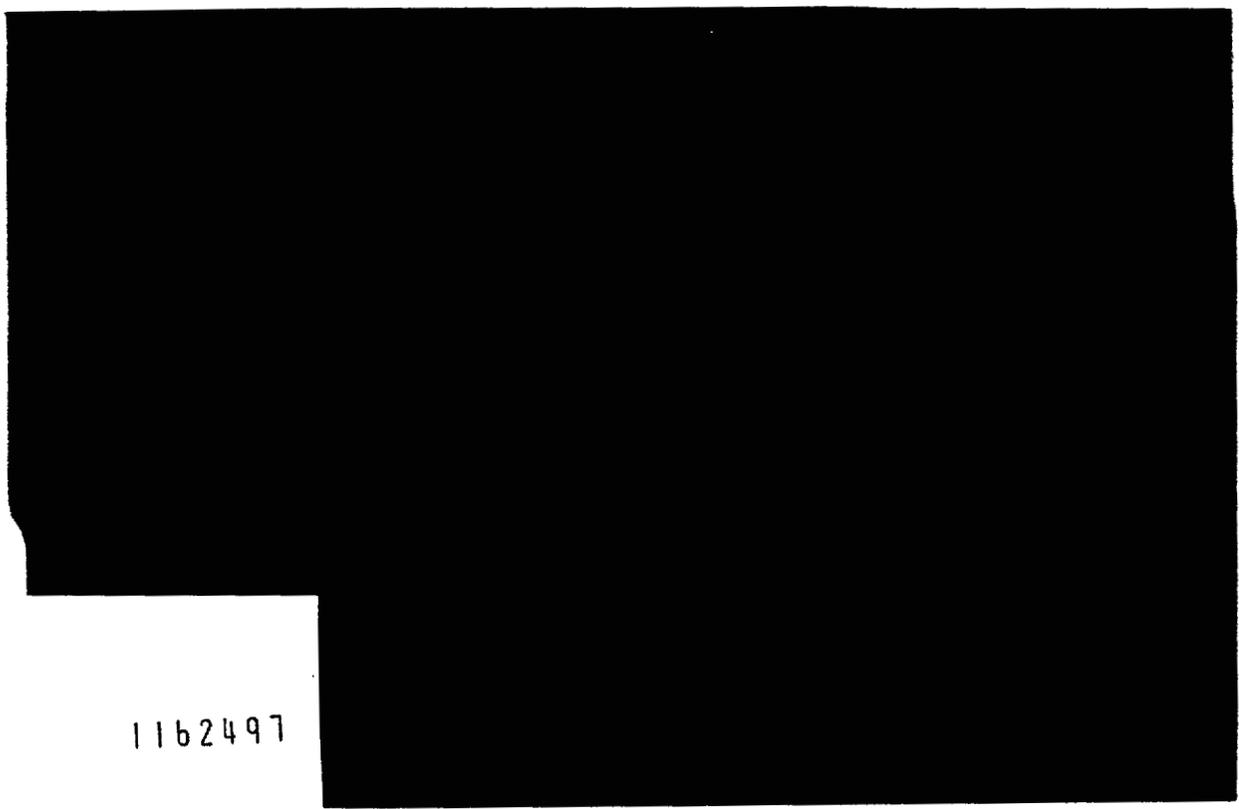

Sincerely,
Howard G. Parker
 Howard G. Parker, M.D.
