Berkeley, California

Dear Doctor Jones:

We are pleased to report that upon recommendation of the National Advisory Heart Council at its meeting on November 19-21, 1953, the Surgeon General has approved your application for a research grant.

The number, amount, period, budget categories, and recommendation in reference to additional years of support are specifically stated for this grant on the attached Statement of Research Grant Award. You may obligate these funds at any time after the beginning date shown on the Award Statement even though check in payment of the grant may be delayed several weeks.

A second attachment (INFORMATION REGARDING REQUESTS FOR CONTINUATION OF PHS RESEARCH GRANTS) pertains to requests for continuation of support of this project in succeeding years.

When you applied for this support you were asked to describe your research project in order that study section and council would have an adequate basis for review and recommendation of your request; but it is recognized that investigators must be free to follow promising leads. I wish to emphasize that, under Public Health Service Policy, you are permitted to deviate from your described plan and to pursue freely any leads which, in your opinion, are likely to be more productive than the plan described in your application.

Please let us know if you have any questions regarding these matters.

Sincerely yours,

*James Watt*

James Watt, M. D.  
Director, National Heart Institute
