EXPLANATION OF STATEMENT OF RESEARCH GRANT AWARD

- I. PERIOD OF GRANT: Obligation of funds from this research grant may be made only during the period specified in the Statement of Research Grant Award, and may not be made before the beginning date or after the ending date of this period. If the beginning date indicated is not acceptable to the investigator, he should advise the Division of Research Grants at once. If, during the period of the grant, the investigator wishes to extend the ending date without additional funds, approval for such extension should be requested by letter.
- II. PAYMENTS: For all new grants payment of the full amount will be made in one installment at the beginning of the grant period. For all continuation grants payment will be made in two installments: (1) an initial payment of one-half of the total amount approved and (2) a second payment, following the receipt of the financial report covering the preceding grant period. This second payment will be reduced by the amount of any unobligated balance from the previous grant. No unobligated balance may be carried over into a continuation period for the purpose of increasing the budget of a continuation grant beyond its approved total amount.
- III. TRANSFER OF FUNDS BETWEEN CATEGORIES: Expenditures of funds within each category may be made at the discretion of the grantee. Transfers into "Personnel" or into "Consumable Supplies" from any other category may be made at the discretion of the grantee unless the total of ALL transfers between categories exceeds 25% of the approved budget, in which case prior approval must be secured from the Public Health Service. No transfers may be made into "Permanent Equipment," "Travel," "Other Expenses," or "Overhead" without prior approval of the Public Health Service.
- IV. FUTURE COMMITMENT: The Statement of Research Grant Award indicates to the investigator all future commitment that has been recommended for his project. Such commitment is contingent upon appropriation of necessary funds by the Congress. If no future commitment is indicated, any continuation application for this project must compete for uncommitted funds.

Where the expenditure of research grant funds is not governed by the Policy Statement, or by the specific provisions of the grant-application, such expenditure should be made in accordance with the rules of the grantee-institution.
