TAB Preliminary Working Memorandum #10

SELECTED REFERENCES ON CRITERIA FOR ESTIMATING
HUMAN LETHALITY FROM RESIDUAL RADIATION

I. Derivation of the criteria, including mathematical models.

1. Cripwell, F. J. 1961. Calculations of effective biological dose of nuclear radiation. Informal publication No. 1, August 1961, Canadian Army, Operational Research Establishment, Department of National Defence, Ottawa, Canada.
2. Davidson, H. O. 1957. Biological effects of whole-body gamma radiation on human beings. Operations Research Office, The Johns Hopkins University, The Johns Hopkins Press, Baltimore, Maryland. 101 pp.
3. DeVaney, J. F. 1961. Operations in fallout. OCDM-SA-61-13, June 1961. Operations Research Office, for the Office of Civil and Defense Mobilization.
4. Dixon, H. L. 1959. Comparison of effective biological doses for three alternative recovery rates. Memorandum report, SRI Project No. IU-2690, December 1959. Stanford Research Institute, Menlo Park, California, for the Office of Civil and Defense Mobilization.
5. Hawkins, M. B. 1962. The application of the equivalent residual dose concept to operational planning techniques. Civil Defense Research Project, Institute of Engineering Research, College of Engineering, University of California, Berkeley, California, October 10, 1962, for the Office of Civil Defense.
6. Shapiro, E. 1960. Operational significance of biological recovery from chronic irradiation: A comparison of several recovery theories. Research and Development Technical Report, USNRDL-TR-421, May 16, 1960, San Francisco, California.
7. Smith, E. H. 1955. Analysis of animal whole-body irradiation data. AFSWP-496, E. H. Smith and Company, Silver Spring, Maryland.

1168377

8. Wade, W. O., et al. 1962. The possible use of analog computers for the equivalent residual dose computation. Civil Defense Research Project, Institute of Engineering Research, College of Engineering, University of California, Berkeley, California, October 30, 1962, for the Office of Civil Defense.
9. Wagner, L. F. 1962. An IBM 704 computer program for calculating the equivalent residual dose in complex operational situations. Civil Defense Research Project, Institute of Engineering Research, College of Engineering, University of California, Berkeley, California, October 30, 1962, for the Office of Civil Defense.

II. Background information on computer damage and contamination assessment methods.

10. Brewer, H., E. Cagley, R. Martin, E. Rose, and D. Rowland. 1963. Dusty III: An improved mathematical method of locating fallout on a spherical earth. NREC Technical Report No. 9, March 1963.
11. C-E-I-R, Inc. 1960. Computational system for urban and nationwide damage assessments (U). Part A -- System logic and applications. June 1960. C-E-I-R, Inc., Arlington, Virginia, for Defense Atomic Support Agency. Secret DI.
12. C-E-I-R, Inc. 1960. Computational system for urban and nationwide damage assessments (U). Part B -- Computer program flow diagrams. June 1960, revised May 1962. C-E-I-R, Inc., Arlington, Virginia, for Defense Atomic Support Agency. Secret DI.
13. C-E-I-R, Inc. 1960. Computational system for urban and nationwide damage assessments (U). Part C -- Computer program descriptions. June 1960, revised May 1962. C-E-I-R, Inc., Arlington, Virginia, for Defense Atomic Support Agency. Secret DI.
14. C-E-I-R, Inc. 1960. Computational system for urban nationwide damage assessments (U). Part D. -- System operating instructions. June 1960, revised November 1962. C-E-I-R, Inc., Arlington, Virginia, for Defense Atomic Support Agency. Secret DI.

15. C-E-I-R, Inc. 1963. The COBRA System. Comprehensive Blast and Radiation Assessment System (U). December 1963. C-E-I-R, Inc., Arlington, Virginia, for Defense Communications Agency, National Military Command System Support Center. Confidential DI.
16. Cohen, N. D. 1964. The quick count system: a users' manual. RM-4006-PR, April 1964. The RAND Corporation, Santa Monica, California, for the United States Air Force.
17. Department of Defense, Weapons Systems Evaluation Group. 1961. An analytic model of close-in deposition of fallout for use in operational-type studies. WSEG Research Memorandum No. 10 with the Supplement of October 1960, reprinted October 1, 1961.
18. Department of Defense, Weapons Systems Evaluation Group. 1962. Population vulnerability model (Brisk/Frisk). Draft Report, January 31, 1962.
19. Laure', L. G. 1964. Streak IV: NREC Rapid damage assessment program. NREC Technical Report No. 5, revised March 1964.
20. Lewicke, V. and I. E. Gaskill. 1961. NREC Damage assessment computation program. Jumbo III. NREC Technical Report No. 2, revised August 1961.
21. Stanford Research Institute. 1962. Statistical methods of estimating damage from nuclear attacks on CONUS (U). SRI Project No. IM-3650, December 1962. Stanford Research Institute, Menlo Park, California, for Defense Atomic Support Agency. Secret DI.
22. Stanford Research Institute. 1962. A technique for estimating casualties from nuclear attacks on CONUS (U). SRI Project No. IM-3650, December 1962. Stanford Research Institute, Menlo Park, California, for Defense Atomic Support Agency. Confidential DI.
23. Wegner, L. H. 1962. Some extensions of the "Random Bomb Drops" local fallout model of RM-1969. RM 2973-PR, March 1962, The RAND Corporation, Santa Monica, California, for the United States Air Force.
24. Wegner, L. H. 1963. Quick count: A general war casualty estimation model. RM-3811-PR, September 1963. The RAND Corporation, Santa Monica, California, for the United States Air Force.

III. Some illustrative applications.

25. Callahan, E. D., L. Rosenblum, J. D. Kaplan, and D. R. Batten. 1960. The probable fallout threat over the Continental United States. Report No. TO-B 60-13, December 1, 1960, Technical Operations, Inc., Burlington, Mass., for Office of Civil and Defense Mobilization.
26. Department of Defense and Office of Emergency Planning. Nuclear attack hazard in Continental U. S. -- 1963. Volume 1: Problem and approach. (NAHICUS '63) (U). Confidential DI.
27. Department of Defense and Office of Emergency Planning. Nuclear attack hazard in Continental U. S. -- 1963. Volume III: Methodology and input. (NAHICUS '63) (U). Top Secret.
28. Department of Defense and Office of Emergency Planning. Nuclear attack hazard in Continental U. S. -- 1963. Volume III: Summary of attack effect probabilities. (NAHICUS '63) (U). Secret DI.
29. Department of Defense and Office of Emergency Planning. Nuclear attack hazard in Continental U. S. -- 1963. Volume III, Map Supplement: Geographical distribution of effects probabilities. (NAHICUS '63) (U). Secret.
30. Department of Defense and Office of Emergency Planning. Nuclear attack hazard in Continental U. S. -- 1963. Volume III, Appendix A: Vital point availability. (NAHICUS '63) (U). Top Secret.
31. Department of Defense and Office of Emergency Planning. Nuclear attack hazard in Continental U. S. -- 1963. Volume III, Appendix B: Military damage and casualty summary probabilities. (NAHICUS '63) (U). Secret.
32. Department of Defense and Office of Emergency Planning. Nuclear attack hazard in Continental U. S. -- 1963. Volume III, Appendix C: Population status summary probabilities. (NAHICUS '63) (U). Secret.
33. Department of Defense and Office of Emergency Planning. Nuclear attack hazard in Continental U. S. -- 1963. Volume III, Appendix D: Large manufacturing availability probability summary. (NAHICUS '63) (U). Secret.
