Esther Everett Lape
Member in charge
The American Foundation Studies in Government
Westbrook, Connecticut

Dear Miss Lape:

Dr. Warren asked me to send you a list of the research programs currently under way in the School of Medicine.

I am very sorry for my delay in sending this list to you and hope you do not receive it too late for inclusion in your report.

Our faculty members have applied for funds to continue most of these programs in addition to several new programs to start July 1, 1950. As soon as we receive final approval of our requests, I will be glad to send you a listing of additional programs, if you would like me to.

Our faculty at the present time is composed of thirteen full-time men; a Professor of Biophysics, a Professor and an Assistant Professor of Physiological Chemistry, a Professor and an Assistant Professor of Surgery, a Professor of Medicine, a Professor and Associate Professor of Infectious Diseases, a Professor of Radiology, and an Instructor in Radiology, the Dean, Assistant Dean, and a Hospital Administrator, and approximately 65 part-time academic personnel.

We are in the final stages of our building program and hope to have the final plans completed and out for bid within the next month or so. If everything goes along according to schedule, we can expect to start construction in the fall of this year, and open the School and Hospital to students in the fall of 1952.

Sincerely yours,

Jeanne J. Williams
Secretary to Dean S. L. Warren

RESEARCH PROGRAMS
U.C.L.A., SCHOOL OF MEDICINE

TITLE	RESPONSIBLE INVESTIGATOR
1. "Effects of Endocrine Factors on Lymphoid Tissue Composition and Function in Mice with Spontaneous Leukemia and Transplanted Lymphosarcoma"	Elijah Adams, M.D.
2. "Research in the Effect of Steroid Hormones (Particularly Androgens) on Human Metabolism"	Samuel H. Barrett, M.D.
3. "Studies on Experimental Syphilis"	Charles M. Carpenter, M.D. and Ruth A. Beak, M.D.
4. "Studies on Murine Leprosy"	Charles M. Carpenter, M.D.
5. "Evaluation of Streptomycin and Glucosaminolactone and other agents in treatment of dysentery, diarrhea, and experimental infections"	Charles M. Carpenter, M.D.
6. "Study of the Morphology of Mycobacteria by Electron Microscopy"	Charles M. Carpenter, M.D.
7. "The Effect of Bacterial Toxins Upon Cancer"	Andrew H. Dowdy, M.D.
8. "Evaluation of Cancer Diagnostic Tests"	Andrew H. Dowdy, M.D.
9. "Testing Program - Fused Boronite Sulfur"	Andrew H. Dowdy, M.D.
10. "Studies on the Physico-Chemical Behavior of Urinary Steroids"	Harry B. Friedgood, M.D.
11. "A Chromatic Search for Specific Substances Excreted by Cancer-bearing Animals and Patients"	Kathryn F. Fink, Ph.D., Robert M. Fink, Ph.D., and
12. "The Effect of Certain Antisera upon the B-P Carcinoma of the Rabbit"	Klly M. Jacobson, Ph.D.
13. "Studies on Yoshida's Neoplasms"	Ricfus Kinoshita, M.D.
14. "Studies of atypical cellular growth in chick embryos"	William P. Longacre, Jr., M.D. and Willard Smith, M.D.
15. "A Study of the Effects of Temperature on the Progress of Malignancies"	Norman B. Nelson, M.D.
16. "Study of Auricular Arrhythmias"	Myron Prinsmetal, M.D.
17. "Mental Status and Treatment in Parosia"	Thomas H. Sternberg, M.D.
18. "Use of Histamine Leucovorin in the study of Triplammine Hydrochloride"	Thomas H. Sternberg, M.D.
