Re: Beryllium<sup>7</sup>

Dear Joe:

While you were away Dr. John Lawrence received a request for some Beryllium<sup>7</sup> from Dr. Herman Lisco in Argonne who had previously tried to reach you. This was a rushed order and Dr. Lawrence asked that I endeavor to accommodate Dr. Lisco.

Dr. Lisco had been working on a program and needed the Beryllium<sup>7</sup>. He had previously contacted Dr. Wright Langham of Los Alamos, who had a standing order with Shields Warren for some Be<sup>7</sup> at the 60" cyclotron. Dr. Langham informed me by telephone that he no longer had a need for the Be<sup>7</sup> sample, and that he would like to have it forwarded instead to Dr. Lisco. I notified Russell Ball regarding this request, and he agreed to change the destination of the Be<sup>7</sup> shipment to Argonne, with the provision that he would subsequently receive a confirming order.

A Be<sup>7</sup> sample was ready for shipment, and I contacted Tom Putnam, informing him of the change.

Sincerely yours,

*Cornelius A. Tobias*
