Crocker Laboratory
Berkeley 4, California

Dear Dr. Hamilton:

Enclosed is a copy of our report which I promised you on my visit to your laboratory in October. I also want to thank you for the time you gave in discussing the uranium problem with me.

Incidentally, you recommended that a Basset hound would be best for our enriched uranium inhalation experiment because its life span was of the order of 5 years. I have contacted several veterinarians about this and they are not aware of this relatively short span. Perhaps you have some data or a reference to the life span of the Basset hound which I could use. Also, do you know of a supplier for this species?

Sincerely,

S. R. Bernard
