Dr. J. G. Hamilton
Radiation Laboratory
University of California
Berkeley 10, California

Dear Dr. Hamilton

In reply to your letter of March 31, 1947, I am sorry that I disturbed you with my letter of March 20, 1947. On reviewing the situation in regard to the eight reports about which you inquired in your letter of March 17, 1947, I now find that the ditto masters of the five reports that have not as yet been submitted for declassification are here. We are arranging to have the necessary number of copies prepared and we will submit them for declassification. There should be no problem with these reports that deal exclusively with animals in view of your willingness to permit the necessary deletions, however, one of the reports treats of a comparison of Metabolism in Man and in the Rat. For your information, such reports are now being reclassified "Restricted", but they are not being declassified. This is upon recommendation of the Medical Advisors to the Atomic Energy Commission.

We will notify you when the reports have been declassified.

Very truly yours,

ARGONNE NATIONAL LABORATORY
