Dear Dave:

Thanks very much for the papers by Hart on the analysis of tracer experiments. As you know, this subject continues to be my major interest, and I would greatly appreciate your calling to my attention any similar contributions you encounter in the future.

Bob Conard and I just returned from Rongelap. There was a greatly increased background on the ship due to fallout at Eniwetok, so the new data is not as clean as the original would have been, but at least this time we do have the data and it looks as if it will be useful.

Sincerely yours,

James S. Robertson, M.D., Ph.D.
