 FOLDER Human Protocols 1950-1963

Dear Paul:

I have your letter of November 16, addressed to Dr. Van Slyke, asking if anyone in the department of medicine would have tritium material to be presented at the next meeting of the Laboratory Directors.

We are just beginning studies on tritium which at this moment are at the stage of developing counting methods, and it is impossible to say whether we will have anything to present or not, so I do not think you should plan to have us scheduled for a paper. On the other hand, if our method is working at the time the meeting is held here, we should be glad to demonstrate it to any of the visitors who might be interested.

It was indeed a pleasure to see you in Las Vegas, and I am looking forward to having the group here at Brookhaven in February.

With very best regards,

Sincerely,

Lee E. Farr, M. D.
 Chairman, Medical Department
