Procurement of B-10
Project H-15

Prior to our request to you to procure additional B-10 for use in experiments now under way in the treatment of brain tumor, this matter was discussed with Dr. Charles L. Dunham, Chief of the Medical Branch of AEC, and Dr. Shields Warren, Director of the Division of Biology and Medicine, AEC.

The data which were available as of Tuesday and Wednesday, February 20 and 21, were given to them. Their reception of these data was enthusiastic and they were of the opinion that further trials were warranted and that material should be made available.
