

Investigators: Hankes, L. V., Lippincott, S. W., Brown, R. R.
 Title: and Price, J. M., and Carson, P.
 Metabolism of Tryptophan. R
 Date: 21 April 1961
 Project No.: H-69 (modified). Patients to be administered tryptophan-
 2-C¹⁴ or tryptophan-7a-C¹⁴ intravenously in sterile aqueous solution.
 As noted in the original request, the known metabolism of labeled
 tryptophan does not suggest any critical organs except the liver, and
 in this case, with intraperitoneal injection, less than 6% of the
 injected dose was found after 24 hours in the whole liver.

Approved:

Committee on Use of Radioactive Isotopes in Patients:
