FOLDER HUMAN STUDIES COMMITTEE

Dear Bob:

This is to confirm our previous phone conversation about your agreement to serve on a Human Studies Committee for the use of radioisotopes in research by the Health Services Laboratory.

In addition to myself and two other members of the Health Services Lab, Tom Mitchell and Glenn Haluska have also agreed to serve on this committee. If it would be possible for you to come visit the Health Services Lab someday so that we can discuss the committee and the program further, please let me know. We also might be able to have a group meeting in town when Glenn Haluska finds it convenient to be here and we could discuss some of the aspects of the program then. Thanks for your help.

Sincerely,

Original Signed By
John H. Spickard, M.D.
John H. Spickard, M. D.
Medical Director
Health Services Laboratory

bcc: Donald I. Walker 

Don, I think that it would be helpful to have Claude or someone rewrite his proposed guidelines for the Human Studies. I feel that we should have an entire package of our procedures and protocols so that we can intelligently discuss these with the doctors who have so kindly volunteered to serve on the Committee. I think that whoever anticipates doing research involving human studies should be involved in establishing our basic procedures and should promptly respond to this request to assure our compliance and cooperation with Joe Goldstein's group.

Note: Similar letters sent to doctors Tom Mitchell and Glenn Haluska.
