IN REPLYING, ADDRESS THE

Washington 25, D. C.

December 13, 1951

Dr. Shields Warren  
Director, Division of Biology and  
Medicine  
Atomic Energy Commission  
Washington 25, D. C.

Dear Dr. Warren:

It has been almost a year since we held our last meeting January 25, 1951, to discuss the progress and findings of the Uranium Mining and Milling Study which our Division is conducting in the Colorado plateau area. The discussions and suggestions, which representatives of your Division gave at that meeting, were most helpful to us.

We have collected a great deal of additional information during the past year and are planning to hold another meeting at 10:00 A.M., January 23, 1952, at our Field Headquarters, Division of Occupational Health, 1014 Broadway, Cincinnati, Ohio. We would greatly appreciate it if one or more representatives of your Division would participate in this meeting. I should like to stress the importance of the meeting. It not only provides us with an opportunity to bring other concerned organizations up to date on the progress of the study but also makes available to us the experiences of other persons specially trained in this field for interpretation of the data collected and the future planning of the study.

We shall look forward to your participation in this meeting.

Sincerely yours,

*Seward E. Miller*  
Seward E. Miller, Medical Director  
Chief, Division of Occupational Health
