Dr. Lauren R. Donaldson
Applied Fisheries Laboratory
University of Washington
Seattle 5, Washington

Dear Lauren:

We have four (4) samples which you sent us for which we have no data. I am not sure whether we received any information on these, or if we did, whether the letter has been misplaced. If you could give me the data for samples: 1349 - liver and muscle; 1353 - liver and muscle; 1370 - liver and muscle; and 1361 - liver, I would appreciate it very much. As soon as we get this information, we will process these samples.

I expect to arrive at Seattle Airport at 9:30 P. M., April 24th and would like to visit you at the laboratories the next day. I will only have until 8:30 P. M. on the 25th to be with you. Would you be kind enough to make a reservation at a good hotel for the night of the 24th.

Hoping to see you soon,

Sincerely yours,

Ira B. Whitney, Assistant Chief
Analytical Branch
Health and Safety Laboratory
