

October 18, 1962

Leo M. Meyer, M.D.
 South Nassau Communities Hospital
 2445 Oceanside Road
 Oceanside, New York

Dear Leo,

Glad to hear you will include tritium T.B.W. in your plans for your next South Pacific vacation among the Morchallese. We will not only give you the tritiated water but also do the assays and calculations.

I will not be here when you pass through Berkeley but I will have the tritium and instructions ready for you. When you arrive here, contact Mrs. Rosemary Hughes or Mrs Patricia Blanche in my lab. On your way back from the Pacific you can leave the plasma or urine samples with us for tritium assay. The final results will be mailed to you or to whomever you designate.

Jean is looking forward to your visit, particularly since I will be out of town. I passed your greetings on to John Weaver and Jim Born. They asked, "Who's he?".

Sincerely,

William E. Biri
