BEST COPY AVAILABLE

Dear Ted:

Per our agreement to provide Livermore's Dose Assessment for Enewetak Atoll to you as soon as possible and within the 7-10 days prior to August 12 which you requested, enclosed are five copies of the Livermore preliminary draft reports for you and for your consultants.

Please be aware that since it is a draft report the content is yet subject to change. Undoubtedly there may be some alteration of the text and of the organization of the document. While it is not expected that the calculated dose values will change in a significant manner, there may be some revisions as additional information becomes available or as a result of further analyses or review.

Enclosed also is a single copy of those appendices which are available at this time. Some of these are being revised to provide for easier presentation, however. Complete sets of the appendices, including both revisions of the enclosed appendices and those appendices which are not yet available, will be provided to you as soon as possible, probably within the next day or two. We will send sets of the appendices to you and directly to each of your consultants.

I hope that this draft material will be helpful to you and to your consultants. You and they are welcome to discuss any aspect of the document directly with William Robison at the Lawrence Livermore Laboratory or with me.

Please let me know if we can be of further assistance to you.

Sincerely,

Bruce W. Wachholz, Ph.D.  
Office of Environment
