

DRAFT  
LAMiazga:bh  
4/29/74

728063

Examination of the medical file for CAL-3 disclosed certain data of interest in addition to that shown on the medical records, which is as follows:

(1) A release dated July 27, 1973, signed by the patient and witnessed by D. H. Roberts, DO, authorizing release of record on information to Christine Waterhouse, M.D., University of Rochester.

(2) A letter from the subject dated July 23, 1966, which is as follows:  
"Dr. Dykes informed me that he had received a letter inquiring about my physical condition.

"I am still able to walk on my artificial leg. My condition is fair.

"Does the hospital ever finance trips for patients to come back to the hospital for tests and observations. If so, I would be happy to come back any time after September 15 for tests and observations. There are some things about my condition that may interest you. My doctor is not a specialist or a surgeon so I haven't discussed my case with him.

"Please let me know if you are interested."

(3) No action was taken on the above because of the lack of funds.

DISCLOSURE TO CAL-3

The following is a verbatim account of the statement of disclosure to CAL-3 as copied from the hospital chart:

The experimental nature of the intramuscular injection of the radioactive tracer sample was explained to the patient, who agreed on the procedure. The patient was in fully oriented and in sane mind. Injection was given into the gastrocnemius muscle of the left leg and the area marked with circle. Injection made at center of circle. Needle depth equals 2 centimeters. No blood appeared on aspiration and no bleeding after removal of needle. At explanation of the procedure to the patient and assisting in procedure were Mrs. Mary Wootton, R.N., Dr. Donald F. Bellamy and Dr. Ray Mullen.
