Dr. James L. Liverman
Assistant General Manager for
Biomedical and Environmental Research
U. S. Atomic Energy Commission
Washington, D. C. 20545

Dear Jim:

When I was in Germantown last week you mentioned that you had the impression that appointments to our Review Committee for Research Projects Involving Human Subjects (human use committee) had been made by the Director of our Radiological and Environmental Research Division. I do not know what your source of information was, but I find on investigating the matter that all formal appointments to the Committee have been made by the Laboratory Director, as you would expect. Of course, I shall continue this practice.

I hope this sets your mind at ease.

Sincerely,

Bob
