January 6, 1948

Memo to: Dr. Bale
From: Dr. Blair
Subject: HUMAN METABOLISM PROGRAM

By phone on January 2nd, Dr. Wolf stated that he had received a decision from Dr. Shields Warren that the human metabolism work under Dr. Bassett was to be discontinued.

Consequently, unless some new program is presented, it will no longer be necessary to retain Dr. Bassett's nursing personnel.

Dr. Wolf would also like Dr. Bassett to write a complete history of the work done to date to be kept on file.
