Volunteers In The Iodine Studies

Carl R. Robertson, Info. Resources Mgmt. Officer
Office of External Affairs

As near as can be determined, the following individuals were participants in the studies involving internal administration of radioactive iodine to human volunteers:

Drank Milk Containing Radioiodine

[REDACTED]

Breathed Air Containing Radioiodine

[REDACTED]

Names unidentified

To the best of my knowledge, after staff search of reports and notebooks, these are the volunteers who participated in the subject studies.

M. Marcy Williamson, Director
Radiological and Environmental
Sciences Laboratory
