C O N F I D E N T I A L

Professor E. R. Gilliland
Department of Chemical Engineering
Massachusetts Institute of Technology
Cambridge, Mass.

Dear Gilliland:

We shipped this morning a fifty-gram sample of the granules which we prepared last October and which seem to be the best preparation we have yet made. They still have a capacity above 4.7%.

Have you had any news from Annapolis on the behavior of the 300 cu. ft. per hour machine?

I want to thank you once again for the kind attention which you showed me during my stay in Boston.

Sincerely yours,

Melvin Calvin
