BEST COPY AVAILABLE

Transmitted herewith are three sets each of the angular ties for station 60. Only four observations were taken for each direction, because we desired to expedite the work and a new crew was being tested. The work was done carefully, however, and the results appear to be good. Therefore, if it is possible, we suggest using this data with the precise measurement of station 2230 (transmitted by O/S 6679) to make the location of station 60.

We plan to re-observe these angles, taking eight readings per station, as soon as time permits. This data will be forwarded to you upon completion. Items included are as follows:

- 1. F.B. 1050, Pgs. 188-193
- 2. Abstracts of directions Nos. 74, 75 & 76
